

## **THE COMPANY**

Dial Cordy and Associates Inc. is a natural resource focused environmental consulting firm with offices located in Jacksonville Beach and Miami, Florida and Wilmington, North Carolina. The company provides a wide range of services including natural resource and marine investigations, ecological/wetland services and permitting, NEPA document preparation and compliance, environmental planning, and environmental monitoring for a variety of federal, state, municipal, and private clientele.

## **THE OPPORTUNITY**

### **Environmental Scientist\Ecologist – NEPA, Environmental Planning, Project Management**

The Jacksonville Beach office is searching for a motivated individual with prior experience in preparing NEPA documents, performing data analysis and report preparation, conducting and managing field investigations, preparing environmental permit applications and associated tasks, and managing moderate to complex projects. Applicants must have at least a Master's degree in an environmental or ecological field, have at least five years of experience working in the private or federal sector, and have excellent communication, organization, and writing skills. Applicants must be able to demonstrate successful management of environmental projects.

**Job Location: Jacksonville Beach, FL**

## **RESPONSIBILITIES**

- Project and client management
- Preparation of NEPA compliance documents including Environmental Assessments and Environmental Impact Statements
- Analysis and synthesis of environmental and planning information as it pertains to NEPA compliance, environmental permitting, and feasibility studies
- Preparation of environmental documents including Biological Assessments, EFH Assessments, and Coastal Zone Management Act consistency evaluations
- Preparation of environmental permit applications issued by the USACE and state and municipal agencies, particularly in Florida and Georgia, but potentially in other states in the southeastern United States
- Performance of wetlands delineations including characterization of sites for mitigation and restoration
- Client interaction in professional and field settings
- Travel to work sites primarily in the southeastern United States

## **REQUIRED QUALIFICATIONS AND EXPERIENCE**

- Master's degree in Biology, Ecology, Environmental Science, or related disciplines
- 5+ years of experience performing above duties

## **ADDITIONAL EXPERIENCE PREFERRED**

- Prior experience working on USACE civil works projects and on projects for other federal clients
- GIS and ArcView

## **BENEFITS**

Company offers advancement opportunities, health insurance, vacation, and training. Great working environment.
